

# KYLE BENTLE

kyle@kylebentle.com | [kylebentle.com](https://kylebentle.com)

Senior UX and product designer with 7 years in EdTech and SaaS, focused on complex data products and the users who rely on them. A decade in data journalism built instincts around clear, concise visual communication and decision-making under pressure. Experienced leading design from discovery through delivery, managing designers, and building a team environment where people feel supported. Skilled at collaborating across product, engineering, and customer experience teams.

## Openfield

### UX Design Lead, January 2022 - Present

- Lead UX design for enterprise clients across EdTech and SaaS, guiding projects from discovery and user research through implementation and post-release measurement.
- Drove a 42% reduction in per-capita help searches and a 33% drop in total support volume for a key client through targeted redesign of high-traffic teacher workflows.
- Contributed to a 90% student activity completion rate (up from 50%) following a UX overhaul of an AI-powered learning product; the redesigned experience earned a +78 student NPS.
- Lead a team of 3 to 4 designers on Openfield's largest client engagement, owning workload distribution, resourcing, and timelines across concurrent projects.
- Directly manage associate-level designers, guiding their skill growth and supporting their career development.

### UX Designer, September 2019 - January 2022

- Produced wireframes, interaction flows, prototypes, and high-fidelity UI across multiple concurrent client engagements, from initial sketches through design handoff.

## Chicago Tribune

### Data Visualization Journalist, March 2012 - September 2019

- Designed and developed interactive data visualizations, charts, maps, and editorial graphics for web and print, emphasizing concise, clear, and purposeful communication.

## The Florida Times-Union, Jacksonville.com

### Graphic artist, May 2009 - March 2012

- Designed charts, maps, and interactive graphics for the web and printed newspaper.

## SKILLS

**Design:** User experience design, information architecture, design systems, data visualization, prototyping, wireframing, accessibility (WCAG), inclusive design, typography.
